

# Rossmore Golf Club

Rossmore Golf Club  
Established 1916

**Rossmore Golf Club** has been 93 years in existence. In that time we have gone from a 9 hole course to 18 holes in the early 90's. We have undertaken numerous improvements over these years also. One of the most beneficial was a large scale drainage project, which is still in progress with a yearly sanding programme. This has resulted in our course remaining open even in the wettest weather. Believe us; this has been tested over the last few so called summers. It has been said by visitors that Rossmore Golf Club is the driest parkland course in the country.

Rossmore Golf Club is a very friendly club; we can assure you all of a good welcome and a good test of golf followed by a great 19th.

**Rossmore Golf Club** is:

- open to both Societies and individuals wishing to come and play our course.
- also open to new members and with no joining fee offer new member's affordable membership.

The club recently developed two new holes which opened late in 2010 which enhanced the beauty of the course whilst making it slightly longer.

Golf is one of those games where you can show up on the 1st tee, meet a complete stranger, go out and spend four hours together and on the 18th feel as if you have known each other all your lives. It does not matter what country you are from, or in, the camaraderie is the same.
